
Firefox ActiveX Plugin Instruction

1. Download and install Plugin

Firefox browser not support ActiveX controller it self, so we need download a plugin and make the Firefox support it.

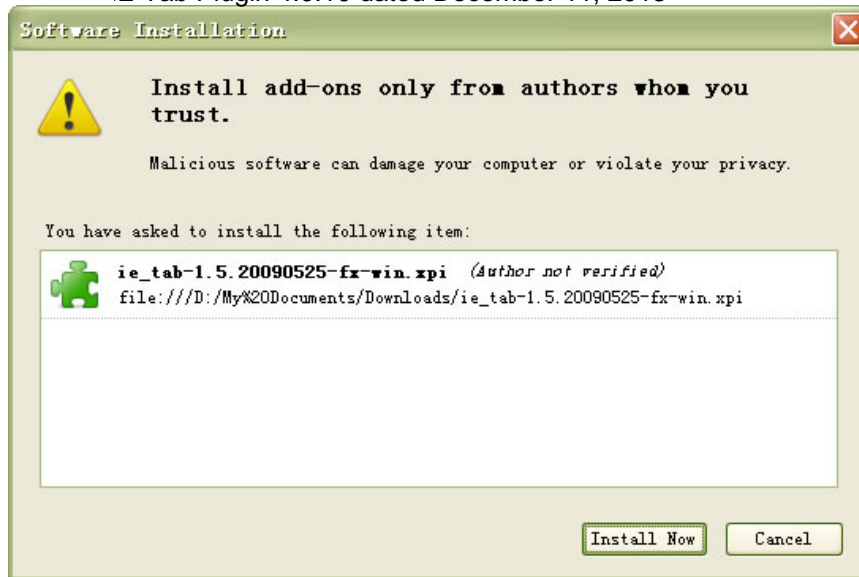

The plugin name is: IE Tab

Download address: [http://www.ie-tab.com/](#)

Use the FireFox Tool Tab: Add-ons

After download, we get a file named "[ie_tab-1.5.20090525-fx-win.xpi](#)"

Open the Firefox, ~~and drag the plugin file to Firefox window directly and Firefox will popup a dialog:~~ In the Add-ons window use the search box "IE Tabs", locate and install the IE Tab Plugin 4.0.10 dated December 11, 2013

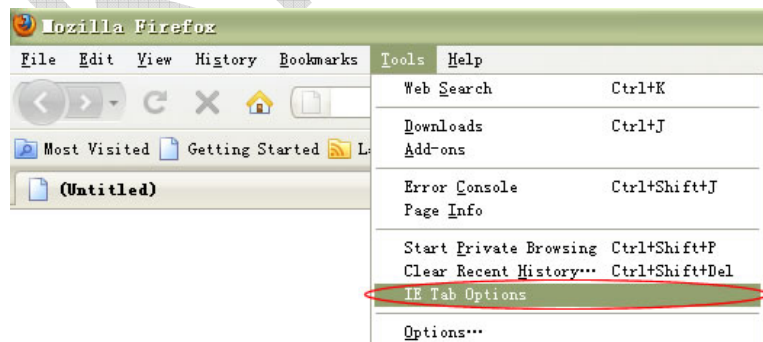

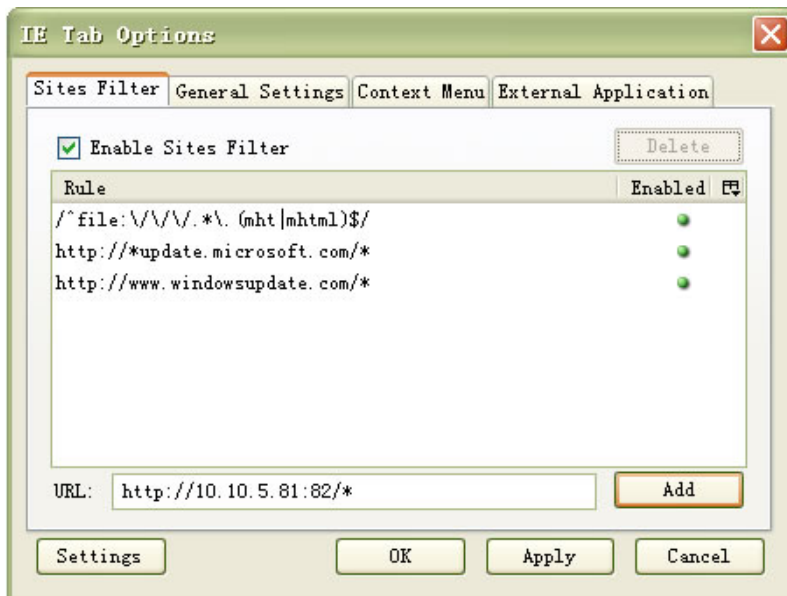

Click "Install Now" for start install, after installation, it will ask for restart Firefox.

2. Plugin setup

After installation, we need add our target address to IE Tab before we start access DVR web client.

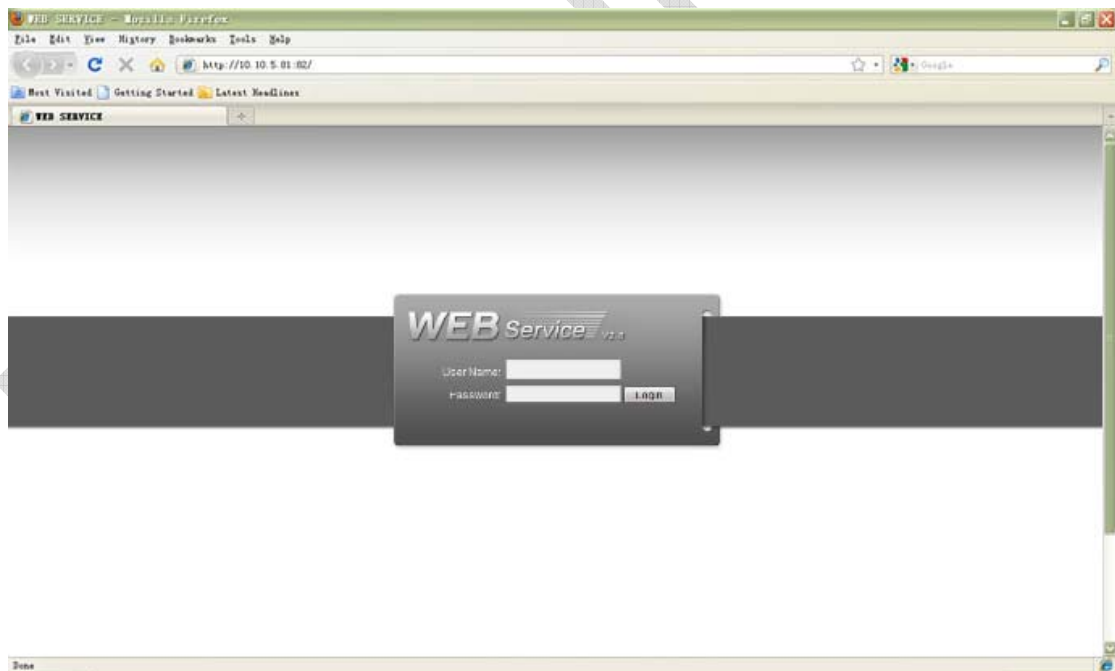

Run Firefox, and open "IE Tab Options" window by "Tools -> IE Tab Options".

As here, my DVR address is “<http://10.10.5.81:82>”, so type “<http://10.10.5.81:81>” to the URL option. **Note: it is need to add “/*” at the end of my address.**

Setup completed, type “<http://10.10.5.81:81>” to Firefox address editor and type enter, it will show our DVR web client login menu.

3. Download and install Firefox.

We can download the Firefox browser from www.firefox.com.

And the latest version is ~~3.0.2~~ 26.0.0

After download, please install as normal steps.
