

How to View Live Sheep Cameras in FireFox

SECURITYPLUS-CAMERAS.COM

FireFox needs to install a web **ActiveX Program** to view live sheep cameras.

In a FireFox browser window go to the top of the menu and click on the **Tool** tab.

Go down and click on the **Add-ons** tab. In the Add-ons window look for the search box in the under right-hand corner. In the search box search for "**IE Tab**".

In the box below the search box different options will be available. Look for "**IE Tab plugin 4.0.10**" dated December 11, 2013.

Select to install the "**IE Tab plugin 4.0.10**" add-on.

Restart your FireFox browser.

Now go back to the **Tool** tab and go down to the new tab named "**IE Tab Options**".

Open the **IE Tab Options** and in the URL box enter "**http://67.41.40.67:8091/***".

Click **Add**, then **Apply** and then exit the menu.

In your FireFox browser URL box enter "**http://67.41.40.67:8091**" and go to the camera login page.

Enter the user name and password:

User Name: **sheep**

Password: **sheep**

To use other DVRs or NVRs you will need to add the IP address for each device in the **IE Tab Options** menu.

2015 - Issues with the IE Tab plugin, not working with the new Firefox updates
We have switched to using smart phones and tablets using apps from the app stores.
Benefit is low power usage and being able to leave the cameras connected 24 hours a day.
